

RECAPTURE THE YOUTHFUL LUMINESCENCE *of your skin*

Combining the expertise and technologies of renowned physicians, **LUMINESCE™** advanced night repair works while you sleep. This powerful cosmeceutical is designed to help you naturally defend yourself against numerous ageing processes. LUMINESCE™ advanced night repair includes naturally derived ingredients that combat the appearance and signs of premature ageing.

During the normal ageing process, your cells and the gel-like substance that lubricates between them lose hydration, causing your skin to become thin and dry. The growth of new skin cells slows down, creating a dull, sagging complexion, and telomeres, which protect your DNA from damage, become shortened. Nutrients necessary for skin and DNA rejuvenation have greater difficulty making their way inside the cells, and waste products have greater difficulty leaving. Daily routines expose you to free radicals that inhibit the growth of new, healthy cells and deplete the body's store of proteins and lipids.

LUMINESCE™ advanced night repair combines the latest in patented technology to correct the environmental damage of the past and fortify your skin for the future. It supports natural self-rejuvenation mechanisms during the night to reduce the signs of ageing from the effects of harmful agents, leaving your skin renewed and rejuvenated. LUMINESCE™ advanced night repair provides maximum hydration, restores moisture and diminishes the signs of time on your skin.
