

# YOUTH- ENHANCING INTENSE MOISTURE *recovery*

## LUMINESCE™ essential body renewal

delivers the ultimate in deep hydration. This exclusive body lotion has been specially formulated with optimal ingredients under the expertise of world-renowned dermatologist Dr. Nathan Newman to help boost collagen formation, improve skin elasticity and protect against the signs of premature ageing. LUMINESCE™ essential body renewal gently nourishes, restores and softens all skin types, particularly in rough and dry areas, without clogging your pores.

Over the years, your skin loses its youthful appearance as you become exposed to a variety of environmental stressors such as the sun's ultraviolet rays and free radicals. At the visible surface, this creates wrinkles, age spots and a dehydrated, sagging complexion. Below the surface, it changes your skin's structure and accelerates the ageing process. Also known as photoageing, this type of exposure can cause serious and permanent damage to your skin if left untreated. LUMINESCE™ essential body renewal works around the clock to save your skin by encouraging natural rejuvenation processes, leaving your skin feeling soft, supple and rehydrated.

## LUMINESCE™ essential body renewal

uses a powerful phospholipid delivery system to penetrate and replenish your thirsty skin by locking in moisture and stimulating skin renewal. This luxurious, lightweight formula contains potent antioxidant-containing botanicals that help protect your skin naturally and encourage your body's natural processes to produce more proteins like collagen and elastin. LUMINESCE™ essential body renewal provides instant and exceptionally long-lasting dry skin relief to men and women, revealing a healthy, ultra-radiant complexion, all day, every day.
